

# Chance for Children

making a difference through the creative arts

## Who we are

We are a team of professional people working with children and families in West London.

## What we offer

One to one integrative arts therapy sessions for children and young people  
Creative Arts groups for various different situations and people  
Training for professional people and volunteers working in the community

We have been helping children and young people for over 25 years with innovative therapeutic arts programmes in schools, nurseries, children's centres, refuges and with faith communities. These are led by music and drama therapists, counsellors, social workers, community artists and musicians

## We are looking for help

We are a charitable trust, registered in 1991 (charity no 1006359) and are governed by a board of trustees, currently, a chairman, two trustees and a secretary. We have vacancies for trustees with experience in finance and in marketing/social media and we need supporters who can help us with fund raising events
